PREFACE

This index contains over 5000 titles of one-act plays written in English or translated into English from a foreign language, published since 1900. Although the index is not complete, it is comprehensive and serviceable.

HOW TO USE THIS INDEX

The key is the bibliographical identification of a play. Key letters refer to book in which play may be found. Magazine references are given the identification used by the Reader's Guide to Periodical Literature.

The title index contains full information about the individual play, e. g., author, number and kind of characters, setting or background, suitability for elementary or high school pupils, and letters which refer to the Key showing in what book or magazine the play may be found. Refer to the title index from author, subject and collection indexes.
